

Jerry Cessna

As an Agricultural Economist for USDA-Economic Research Service (ERS), Animal Products and Cost of Production Branch, Jerry Cessna specializes in outlook issues for the U.S. dairy industry. He is coauthor of the Dairy section of the monthly Livestock, Dairy, and Poultry Outlook report and several ERS research publications. Before starting his current position with ERS in 2014, he was an Agricultural Economist with USDA-Agricultural Marketing Service, Dairy Programs for 13 years. Mr. Cessna is an active participant on the Dairy Interagency Commodity Estimates Committee, which produces both short-term forecasts and long-term projections. He received a BBA from Baylor University in 1984 and an MA in Economics from Middle Tennessee State University in 2000. Mr. Cessna has been happily married for 32 years. He has a son in college, a married daughter, and two grandsons. He loves to play the trumpet.
